

PICCOLO Splitter

NEW SEASONS STOCK HERE NOW!

**TRUE REFRIGERATED CABIN
AIR CONDITIONING (Engine off)**

**NOW 4 YEARS IN
AUSTRALIAN CONDITIONS**

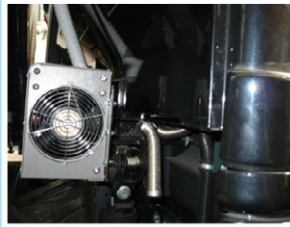

**BETTER AIR DISTRIBUTION DURING STOPS
REDUCES DRIVER FATIGUE**

- ▶ High performance battery powered no-idle truck air-con
- ▶ Remote control with timer function
- ▶ Over 6 hours use on 12 volt trucks
- ▶ Over 8 hours use on 24 volt trucks
 - ▶ Compact and trendy design
 - ▶ High efficiency evaporator with "Automotive Design" outlets for the best internal air distribution

- ▶ Double operation by control panel or remote control
- ▶ Digital display, for temperature and alarm indication
 - ▶ 12 month warranty
 - ▶ Easy to clean filter
- ▶ Internal insulation in EPP for reduced vibration and less noise
- ▶ Easy to install and no need to drill

**+ 950W AIR
COMPRESSOR
BY EUROENGL**

PICCOLO Splitter

Battery powered, no-idle truck parking air-con

MY2012

P S 3000

- High performance battery powered no-idle truck air-con
- Three components system (external compressor unit, internal evaporator unit, AC>DC inverter)
- First version launched in 2004
- More than 3.000 units already sold thanks to truckers' word of mouth
- Tested by TÜV SÜD Italy on vibration table up to 3g

Cooling capacity	3000 btu
Voltage	240Vac
Inverter	1000W 24Vdc or 12Vdc
Current (24V with +30°C T _{amb})	15 Ah
Airflow capacity	> 290 m ³ /h
Fan speed	3 + auto
Dehumidification capacity	14 lt / 24H
Refrigerant gas	R134a
Remote control	with timer function
Minimum battery capacity (24V)	240Ah (24V)
Internal unit noise level	31 db(A)
External unit noise level	42 db(A)

New MY 2012 features

- a compact (max. width 540 mm) proprietary and trendy design and quality materials for the best integration inside top class truck cabins
- high efficiency evaporator with “automotive design” outlets for the best internal air distribution
- double operation by control panel or remote control
- digital display, for temperature and alarm indication
- internal insulation in EPP for reduced vibration and less noise
- easy to clean filter

- easy to install also on sides of cabins, for a better air distribution during stops
- no need to drill the cabins, all tubes can be positioned under the linings

- the very compact compressor / condenser unit weights only 10 kg, allowing an easy installation also under the cabin
- the compressor unit is pre-charged with R134a refrigerant gas
- the refrigerant gas line is made by copper tube, 3,5 meter long
- the compressor / condenser unit was tested by TÜV SÜD Italy on vibration table up to 3g
